

Our Equipment

TACAG and Stansbery Seed & Service pride ourselves on state of the art equipment for efficient, precise application.

The Air Tractor 502B is the industry leader for aerial application. With a 500 gallon payload, the 502B is equipped for both wet and dry applications.

The SATLOC GPS provides precision guidance and flow rate with Intelliflow.

In addition to state of the art equipment, we pride ourselves on a highly trained ground crew, to include agronomist, loaders, and mixers.

Veteran Owned and Operated

Matt Arnold, Pilot

Matt Arnold is a native of Upper Sandusky, Ohio. Son of Frank and Rose Arnold, he graduated in Aviation from The Ohio State University. Matt joined the US Navy in June 1995.

Aerial Application with Military Precision

Matt served in the US Navy as an F/A 18 Pilot, receiving many awards and honors through out his career. His final assignment prior to retirement was Commanding Officer of the Strike Fighter Weapons School Atlantic. Leading the Navy's top Pilots and Aviation Specialists preparing the Fleet. Following his recent retirement he returned to his roots, while still remaining true to his love of the skies.

Partnering With

TACAG is proud to partner with Stansbery Seed & Service.

Stansbery Seed & Service was created to provide whole package services with all the tools needed for a successful season.

Why Aerial Application?

Aerial Application of pesticides is the quickest, most efficient and least obtrusive form of application available.

- Cover more acres in less time
- Does not compact the soil
- Does not cross contaminate
- Will not damage standing crops
